

The Angel University Lecture Series

PSYCHOTIC OR MYSTIC?

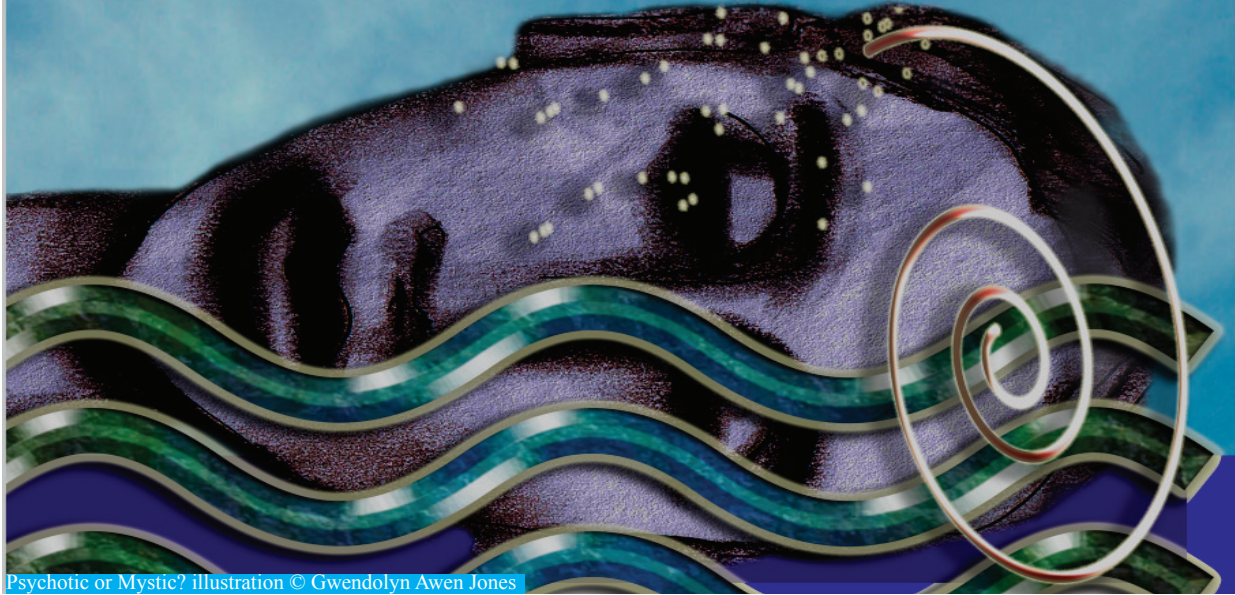

Sunday 28th Oct. 2007 2-5 p.m.

Palm Springs Art Museum

101 Museum Drive, Palm Springs CA 92262

There is a fine line between the spiritual mystic and a person who is psychotic. One reaches high spiritual states of awareness through prayer and meditation, the other through the action of drugs or alcohol breaks open psychic doorways in a chaotic fashion and becomes unhinged by the experience. Understand how street drugs, anti-depressants, anti-psychotics and alcohol affect the brain and the Soul. What is the key to spiritual balance and health? Find out ways to repair the damage done by drugs.

Dr. Ann Blake Tracy, a Ph.D. in Health Sciences with an emphasis on Psychology, has specialized for 11 years in adverse reactions to serotonergic medications, testified in court cases involving the medications for 9 years, is the executive director of the International Coalition for Drug Awareness and is the best selling author of "*Prozac: Panacea or Pandora?*" She will discuss important new research about drugs and their impact on the brain with English medical intuitive and spiritual healer, **Gwendolyn Awen Jones**. For more information about Dr. Tracy's work go to www.drugawareness.org
